## ● How to Rosin Press?

● Take out rosin press from package.

● Plug in the power socket, turn on the power switch ,set temp.&time
for each control panel, Say. 230℉/110℃, 30sec. and raises to the set temp.

● Put the rosin hash or seeds into a filter bag

● Use parchemnt paper to cover the filter bag before placing
on the lower heating element.

● Press the TIMER button on the control panel. The control panel starts
showing a countdown.

● Wait until the countdown ends and the press starts beeping.
Press the TIMER button again to turn off the timer and stop beeping.

● For machine operate, firstly you need to adjust machine pressing force through
pressure nut, turning the pressure nut from right to left for higher pressing force,
in opposite, reduce the pressure.
   Please kindly noted that do not adjust the pressure too high,
and press it by jumping up, use your whole body's weight to press down,
it will damage the machine handle, and influence the machine service life.

● Rosin oil will be adhesive on the parchment paper, you will need to use
the rosin tool to collect the oil when it cools down, and store it on the silicon jar.

3. Please make sure correct outlet before use the device.

4. Cautions, burns can be occur when contact with hot surface.

5. Turn off the Device when not in use and remove the plug.

## Product Specification

Product Sku.: HP230C-X

Product Name: Rosin-tech Heat Press

Product Style: Mini Mechanism
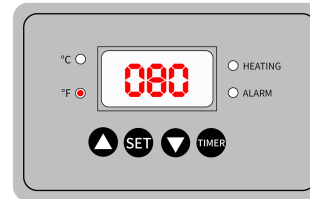

Electric Data:

US: 110V/60Hz, 110W

EU: 220V/50Hz, 110W

Size: 5 x 7.5cm/2 x 3inch

Controller: Digital Control Panel

N.W.: 4.5kg, G.W.: 5kg

PKG: 29*20*31cm

## Control Panel Setting

**Control Panel Window**
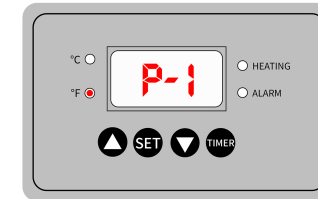

**P-1: Temp. Setting Mode**
Touch SET & ▲▼ to set desired Temp.

**P-2: Time. Setting Mode**
Touch SET & ▲▼ to set desired Time.

**Touch SET key to finish all setting and machine heats up.**

**If There is P-3 Stetting**

**P-3: Switch between °F or ℃.**
Touch SET & ▲▼ to switch between °F or ℃.

**Touch SET key to finish all setting and machine heats up.**
